Abstract

A child harness (40) that includes a child carrying pouch (130) which comprises a generally flexible piece of material (13) that has side edges which define at least a part of respective leg opening (50) in the lower part of the pouch, wherein said piece of material (13) includes an elastically flexible sheet that is enclosed in a fabric casing (68, 69) that comprises a first piece of fabric (69) on one major surface of the sheet and a second piece of fabric (68) on the other major surface of the sheet, and wherein said pieces of fabric (68, 69) are sewn together to provide a seam (61). The seam (61) is placed on one major surface of said piece of material (13) in the region of a respective leg opening (50) at a distance of at least 0.5 cm from the edge (51) of said opening.
